

Keywords index

Rev. Fisioter. Univ. São Paulo, v.9, n.1/2, jan./dez., 2002

Auscultation

Organization and evaluation of a software for teaching respiratory auscultation, 1

Aged

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Amputation

Theory of neuromatrix: a new approach about the understanding of phantom pain, 17

Anorexia nervosa/physiopathology

Posture, movement width and corporal perception assessment of anorexic subjects, 78

Asthma/rehabilitation

Respiratory muscle strength in asthmatic patient submitted by respiratory muscle training and physical training, 43

Biomechanics

Influence of the diabetic neuropathy on the behavior of biomechanical and sensorial responses in treadmill gait, 37

Body image

Posture, movement width and corporal perception assessment of anorexic subjects, 78

Brachial plexus/injuries

Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Clinical protocols

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Communications

Communicative skills: verbal and non-verbal in physiotherapist practice, 36

Computer literacy

Organization and evaluation of a software for teaching respiratory auscultation, 1

Control groups

Respiratory muscle strength in asthmatic patient submitted by respiratory muscle training and physical training, 43

Diabetic neuropathies/physiopathology

Influence of the diabetic neuropathy on the behavior of biomechanical and sensorial responses in treadmill gait, 37

Diagnostic imaging/methods

Postural, evaluation of subjects with internal temporomandibular disorders: applicability of clinical, photographic and radiographic methodology, 80

Electric stimulation therapy

The effects of transcutaneous electric nerve stimulation (tens) in thoracic and abdominal postoperative surgeries – literature review and case report, 23

Evaluation studies

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Posture, movement width and corporal perception assessment of anorexic subjects, 78

Organization and evaluation of a software for teaching respiratory auscultation, 1

Exercise therapy/methods

Analysis of sitting, crawling and walking acquisition of a preterm infants group, 57

Respiratory muscle strength in asthmatic patient submitted by respiratory muscle training and physical training, 43

Gait

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Geriatric assessment

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Infant premature/growth & development

Analysis of sitting, crawling and walking acquisition of a preterm infants group, 57

Labor complications/epidemiology

Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Labor complications/rehabilitation

Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Lung diseases, obstructive/rehabilitation

Pulmonary rehabilitation and quality of life in COPD patients, 9

Memory/classification

Theory of neuromatrix: a new approach about the understanding of phantom pain, 17

Motor activity

Analysis of sitting, crawling and walking acquisition of a preterm infants group, 57
Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Multimídia

Organization and evaluation of a software for teaching respiratory auscultation, 1

Musculoskeletal physiology

Influence of the diabetic neuropathy on the behavior of biomechanical and sensorial responses in treadmill gait, 37

Myocardial infarction/physiopathology

Analysis of the correlation between quality of life and ejection fraction in patients post acute myocardial infarction, 63

Neuromuscular diseases

Influence of the diabetic neuropathy on the behavior of biomechanical and sensorial responses in treadmill gait, 37

Nonverbal communication

Communicative skills: verbal and non-verbal in physiotherapist practice, 36

Pain/psychology

Theory of neuromatrix: a new approach about the understanding of phantom pain, 17

Perception

Posture, movement width and corporal perception assessment of anorexic subjects, 78

Phantom limb

Theory of neuromatrix: a new approach about the understanding of phantom pain, 17

Photography/methods

Postural, evaluation of subjects with internal temporomandibular disturbs: applicability of clinical, photographic and radiographic methodology, 80
Posture, movement width and corporal perception assessment of anorexic subjects, 78

Physical therapy

Communicative skills: verbal and non-verbal in physiotherapist practice, 36
Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69

Physical therapy/education

Organization and evaluation of a software for teaching respiratory auscultation, 1

Physical therapy/methods

Analysis of sitting, crawling and walking acquisition of a preterm infants group, 57
Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Postoperative period

The effects of transcutaneous electric nerve stimulation (tens) in

thoracic and abdominal postoperative surgeries – literature review and case report, 23

Posture

Posture, movement width and corporal perception assessment of anorexic subjects, 78
Postural, evaluation of subjects with internal temporomandibular disturbs: applicability of clinical, photographic and radiographic methodology, 80

Quality of life

Analysis of the correlation between quality of life and ejection fraction in patients post acute myocardial infarction, 63
Pulmonary rehabilitation and quality of life in COPD patients, 9

Questionnaires

Analysis of the correlation between quality of life and ejection fraction in patients post acute myocardial infarction, 63

Respiratory mechanics

Respiratory muscle strength in asthmatic patient submitted by respiratory muscle training and physical training, 43

Respiratory therapy/methods

Respiratory muscle strength in asthmatic patient submitted by respiratory muscle training and physical training, 43

Review of literature

The effects of transcutaneous electric nerve stimulation (tens) in thoracic and abdominal postoperative surgeries – literature review and case report, 23

Risk factors

Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Social behavior

Communicative skills: verbal and non-verbal in physiotherapist practice, 36

Software

Organization and evaluation of a software for teaching respiratory auscultation, 1

Stroke volume

Analysis of the correlation between quality of life and ejection fraction in patients post acute myocardial infarction, 63

Tensile strength

Survey based on medical records about the cases of obstetric brachial paralysis of Ribeirão Preto Medicine University Clinic Hospital – USP, 49

Thoracic surgery

The effects of transcutaneous electric nerve stimulation (tens) in thoracic and abdominal postoperative surgeries – literature review and case report, 23

Women

Interrater agreement of a physical therapy assessment tool of institutionalized elderly females, 69
